

InnoUrba Final conference May 28th and 29th 2009, Oulu

Programme

InnoUrba – the Living and Working Environment for the Future Final Conference May 28th -29th 2009, Oulu

Location: Conference Centre **Lasaretti**, meeting room Aurora
address: Kasarmintie 13

www.lasaretti.com

InnoUrba – the Living and Working Environment for the Future is a project about developing land-use planning methods and solutions for new urban environments in Nordic cities. The project is funded by Nordic Innovation Centre. The objective of the project is to develop land-use planning processes in the Nordic countries so that new innovative operating environments are created and the land-use planning practices evaluated and compared. The project will create a best-practice proposal for a Nordic planning procedure.

- Three case studies in Oulu, Skanderborg and Umeå
- Resident participation

Benefits of the project

- innovative, inspirational and user-friendly environment
- best practices for planners and consultants across national borderlines
- increasing the residents' influence on urban development
- cross-border co-operation

Outcomes

- Green Paper of best practices in planning
- Project implementation through case studies
- Sharing experiences
