

Municipality of Umeå will organise an environmental planning seminar related to InnoUrba December 3rd and 4th 2008. The first seminar day focuses on environmental planning, and includes presentations on InnoUrba projects, InnoUrba research work and environmental issues in planning. The second day focuses on good examples on planning and realisation, and ends with a panel discussion on what can be done in Umeå. The presentation topics include for example architect education in Umeå, InnoUrba research project, examples of ecological housing, environmental aspects in planning and construction.

Selected municipality representatives, decision-makers, planners, construction companies and local media will be invited to the seminar.

In addition to the seminar, a workshop on Ön project will be organised for InnoUrba partners.
